SODIUM BICARBONATE CARTRIDGES

Sodium Bicarbonate Cartridge Specifications	
Type	Sodium Bicarbonate Cartridge
Description	Sodium bicarbonate cartridges are designed for online preparation of liquid bicarbonate solution for the safest and most effective hemodialysis treatment.
Available Sizes	550g, 650g, 750g
Other	» Sodium bicarbonate powder in a polypropylene cartridge for online production of liquid bicarbonate solution » Dust-proof packaging » Open ports help eliminate perforation, reducing the risk of machine damage by undissolved powder

NEPHROCART CHARACTERISTICS

Sodium bicarbonate cartridges, like the NephroCart™, play an essential role in hemodialysis by aiding in the correction of acid-base imbalances in patients with renal failure. These cartridges contain highly concentrated sodium bicarbonate in a dry powder form, encapsulated within dust-proof materials, and meet USP/BP and AAMI standards.

Available in three sizes, the NephroCart™ is universally compatible with systems used for online preparation of liquid bicarbonate, facilitating safe and efficient dialysis treatments. The cartridge is equipped with external caps to enhance protection and ensure hygienic disposal post-treatment, making the product a reliable choice for healthcare settings.

SODIUM BICARBONATE BAGS

Sodium Bicarbonate Bag Specifications	
Type	Sodium Bicarbonate Bag
Description	Sodium bicarbonate bags are designed for online preparation of liquid bicarbonate solution for a single hemodialysis treatment, offering a space-efficient alternative to sodium bicarbonate cartridges.
Available Sizes	550g, 650g, 750g
Other	» Polyamide, polyethylene, hermetically sealed package ready for online preparation of liquid bicarbonate solution » Dust-proof packaging » Angular design prevents loss of powder during use

NEPHROBAG CHARACTERISTICS

Sodium bicarbonate bags, such as the NephroBag™, are crucial in managing acid-base imbalances during hemodialysis for patients with renal failure. These bags feature highly concentrated sodium bicarbonate in a dry powder form, sealed within dust-proof materials to comply with USP/BP and AAMI standards.

Available in three sizes, the NephroBag™ is specifically designed for compatibility with a select range of hemodialysis machines, making the product suitable for a single hemodialysis treatment. The online preparation of liquid bicarbonate is seamless, ensuring safe and efficient dialysis treatments.
